

Prevention...What's the 4-1-1?

Children of Alcoholics Week
February 10-16, 2013

According to a 2012 report by the Substance Abuse and Mental Health Services Administration (SAMHSA), **7.5 million** children under age 18 (10.5% of the population) lived with a parent who has experienced an alcohol use disorder in the past year.

- **6.1 million** children lived with two parents, with either one or both parents experiencing an alcohol use disorder.
- **1.4 million** children lived in a single-parent household with the parent experiencing an alcohol use disorder.
- Of the 1.4 million children, **1.1 million** lived with the single mother and **0.3 million** lived with the single father.
